

SMA Female to TNC Female 4 Hole Flange Adapter

RF Adapters Technical Data Sheet

PE9276

Configuration

- SMA Female Connector 1
- TNC Female Connector 2
- 50 Ohms

Features

- SMA Interface compliant with MIL-STD-348
- TNC Interface compliant with MIL-STD-348

Applications

• Allows Connection Between Series

- Straight Body Geometry4 Hole Flange Mount Method
- Gold Plated Contact
- Contact Plating per MIL-G-45204

Rack Mounted Equipment

Description

Pasternack's PE9276 SMA female to TNC female 4 hole flange adapter is part of our full line of RF components available for same-day shipping. The SMA connector mates mechanically with commercially available 3.5mm and 2.92mm (K) connectors. Our SMA to TNC adapter has a female to female gender configuration. This RF SMA to TNC 4 hole flange adapter allows designers to create external connections on their product enclosures, and can be used in a variety of other rack mount and panel mount applications.

General Purpose Test

RF adapters are often used to enable connections between two connector types that would otherwise not mate. Certain adapter configurations can also be used to protect connectors on expensive equipment where the number of connect/ disconnect cycles is high. An RF, microwave or millimeter wave adapter is connected to the equipment, and the commonly changed connection is made with the adapter which can be easily replaced when it wears out after high usage; such adapters are referred to as connector savers. Pasternack also offers bulkhead, panel mount, hermetically sealed, reverse polarity, and isolated ground adapter varieties to serve all of your RF, microwave and millimeter wave needs.

Mechanical Specifications

| Size | |
